PROFILE

Software Engineer with strong experience in building software, focused on backend development with a solid understanding of modern frameworks. Quick to learn and flexible, with additional skills in front-end development. Enjoys learning new things and exploring fresh ideas.

PROFESSIONAL EXPERIENCE

Backend developer   03/2024 – present
voom-eg 🔗   Egypt - Remote
- **Built and managed APIs** for server management using Proxmox, improving operational efficiency and streamlining server administration processes.
- **Real Estate Management API:** Developed and maintained the Real Estate Management API, focusing on backend functionalities to support real estate operations, such as property listings, units, user management, and data handling. Project Link 🔗
- **Front-End Development Intern:** Participated in building web applications using React and Next.js, helping to create interactive and responsive user interfaces. Project Link 🔗

Backend developer   Dubai, freelancer
- **Developed an API** for an internal dashboard for an *Order and Invoice Management* application. Designed and built the backend, and documented the API with Swagger to enhance ease of use for developers.

Backend laravel   05/2023 – 07/2023
Automata4 Group 🔗   Aleppo, Syria
- Developed a Laravel API project and integrated it with a Vuetify front-end application.
- Gained valuable expertise in working with Laravel within the company through this experience.

Back-End Developer Intern   05/2023 – 07/2023
Sanad Team for Development   Aleepo, Syria
- Focused on web development using PHP and Laravel during my internship at Sanad Team for Development.
- Gained experience in developing websites and applications efficiently.
- Built connections with experienced peers to assist with future challenges.

EDUCATION

Bachelor degree in Inormatics Engineering   09/2019 – 11/2024
University of Aleppo   Aleepo, Syria

PROJECTS

Travel Booking System
A travel booking platform offering features for both admins and users.
Admin API Features:
- **Add new flights**: Admins can manage flight details, such as flight types, notifications, and real-time weather updates.
- **Trip management**: Admins can organize and manage different trip types from the control panel.
- **Notifications**: Admins can send important updates and announcements to users.
- **Weather integration**: Users can view real-time weather conditions through the API.
- **User Management API Features**:
GitHub Repository: Travel-Tourism

Website Worker System

A platform built using Laravel API where workers offer different services, and clients can choose and hire them.

- **Worker Services**: Workers list their services, so clients can browse and pick the best option.
- **Client Selection**: Clients can easily choose and book services from available workers through a user-friendly interface.

GitHub Repository: Worker System

E-commerce Platform

A complete e-commerce website built with Laravel, using various tools and integrations to improve user experience and functionality.

- **Pusher Broadcast Channel**: Allows real-time notifications for an interactive user experience.
- **Fortify & API Sanctum**: Makes logging in, resetting passwords, and managing secure user sessions easy.
- **External API Integration**: Uses Laravel HTTP Client to connect with third-party APIs like the Currency Converter API for efficient external calls.
- **Social Login with Laravel Socialite**: Enables users to log in with their Google or Facebook accounts.
- **Stripe Payment Integration**: Accepts secure payments online, offering users a smooth payment experience.

GitHub Repository: E-commerce Platform

SKILLS

Backend Development
- **Frameworks & Libraries**: Laravel, Node.js, Express.js, Prisma.js, GoLang, Gin, Gorm

Frontend Development
- **Languages & Frameworks**: TypeScript, React.js, Next.js
- **Styling**: Bootstrap, Tailwind CSS, DaisyUI

Database
- **Relational**: MySQL, SQLite, SQL Server
- **NoSQL**: MongoDB

IT & Infrastructure
- **Operating Systems**: Windows Server, Ubuntu Server
- **Network & Server Management**: SSH

System Design & Architecture
Tools & Technology: Docker

Soft Skills
- **Core Competencies**: Effective Communication, Leadership, Problem Solving, Collaboration, Teamwork
